

SAVE WATER IN THE SHOWER!

DECORATE A BUCKET WITH THESE FLOWERS AND PUT IT IN YOUR SHOWER TO COLLECT WATER. THEN USE THE WATER YOU COLLECT TO WATER SOME REAL FLOWERS!

SAVE WATER IN THE SHOWER!

DID YOU KNOW? The average shower uses more than 2 gallons per minute—that's a lot! You can save some of that water from going to waste! Just put a bucket in your shower and decorate it with these flowers. Then you can use the water you saved to water some real flowers.

COLOR THE FLOWERS

MORE WAYS TO USE WHAT YOU SAVED

If you don't have flowers in your home, there are plenty of other uses for the water you saved.

- Water other plants! Vegetables, trees, bushes, grass... all plants need water!
 - Wash your bike! If you use a bucket and a sponge to wash your bicycle instead of a hose you're already saving water. If you use water you collected in the shower you're saving even more!
 - Wash your dog! If the family pet is starting to smell funny, maybe it's time to give them a bath with the water you saved!
- Just don't drink it—if you're thirsty you should get some water that's a little cleaner.

MORE WAYS TO SAVE WATER AT HOME

There are lots of other ways to save water in your home. Every drop counts!

- Turn off the faucet when you brush your teeth! You can save about 8 gallons a day!
- Take a shorter shower! Time yourself to see how long it takes you to get clean, and then try to do it a minute or two quicker next time.
- Take a shower instead of a bath. It uses a lot less water, especially if you take a shorter shower.
- Beat the heat! Water your plants early in the morning instead of the middle of the day when the hot sun can dry them out.

If we all work together in little ways we can make a big difference!

WATER THE FLOWERS

Can you bring the water from the bucket to the flower in the middle of the maze?
