

Wendell and Penelope's GUIDE TO FOGS

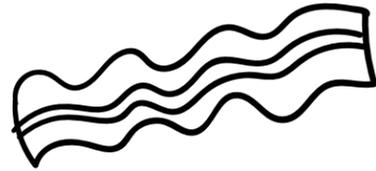

Hi! We're Wendell and Penelope and we're here to tell you about FOGs: fats, oils, and grease.

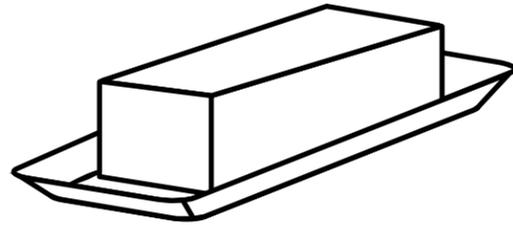

It's important to keep FOGs out of your drains and toilets.

Here are some FOGs you might find in your kitchen.

Bacon Grease

Butter

Mayo

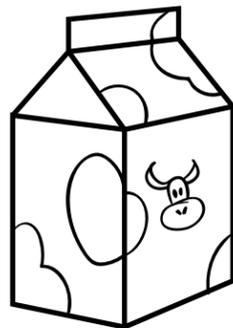

Cooking Oil

Gravy

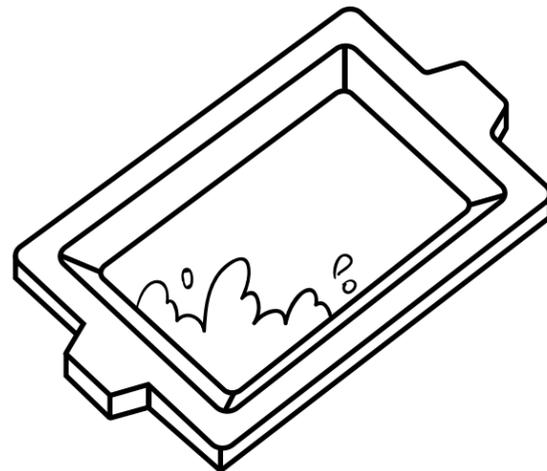

Salad Dressing

Milk and Cream

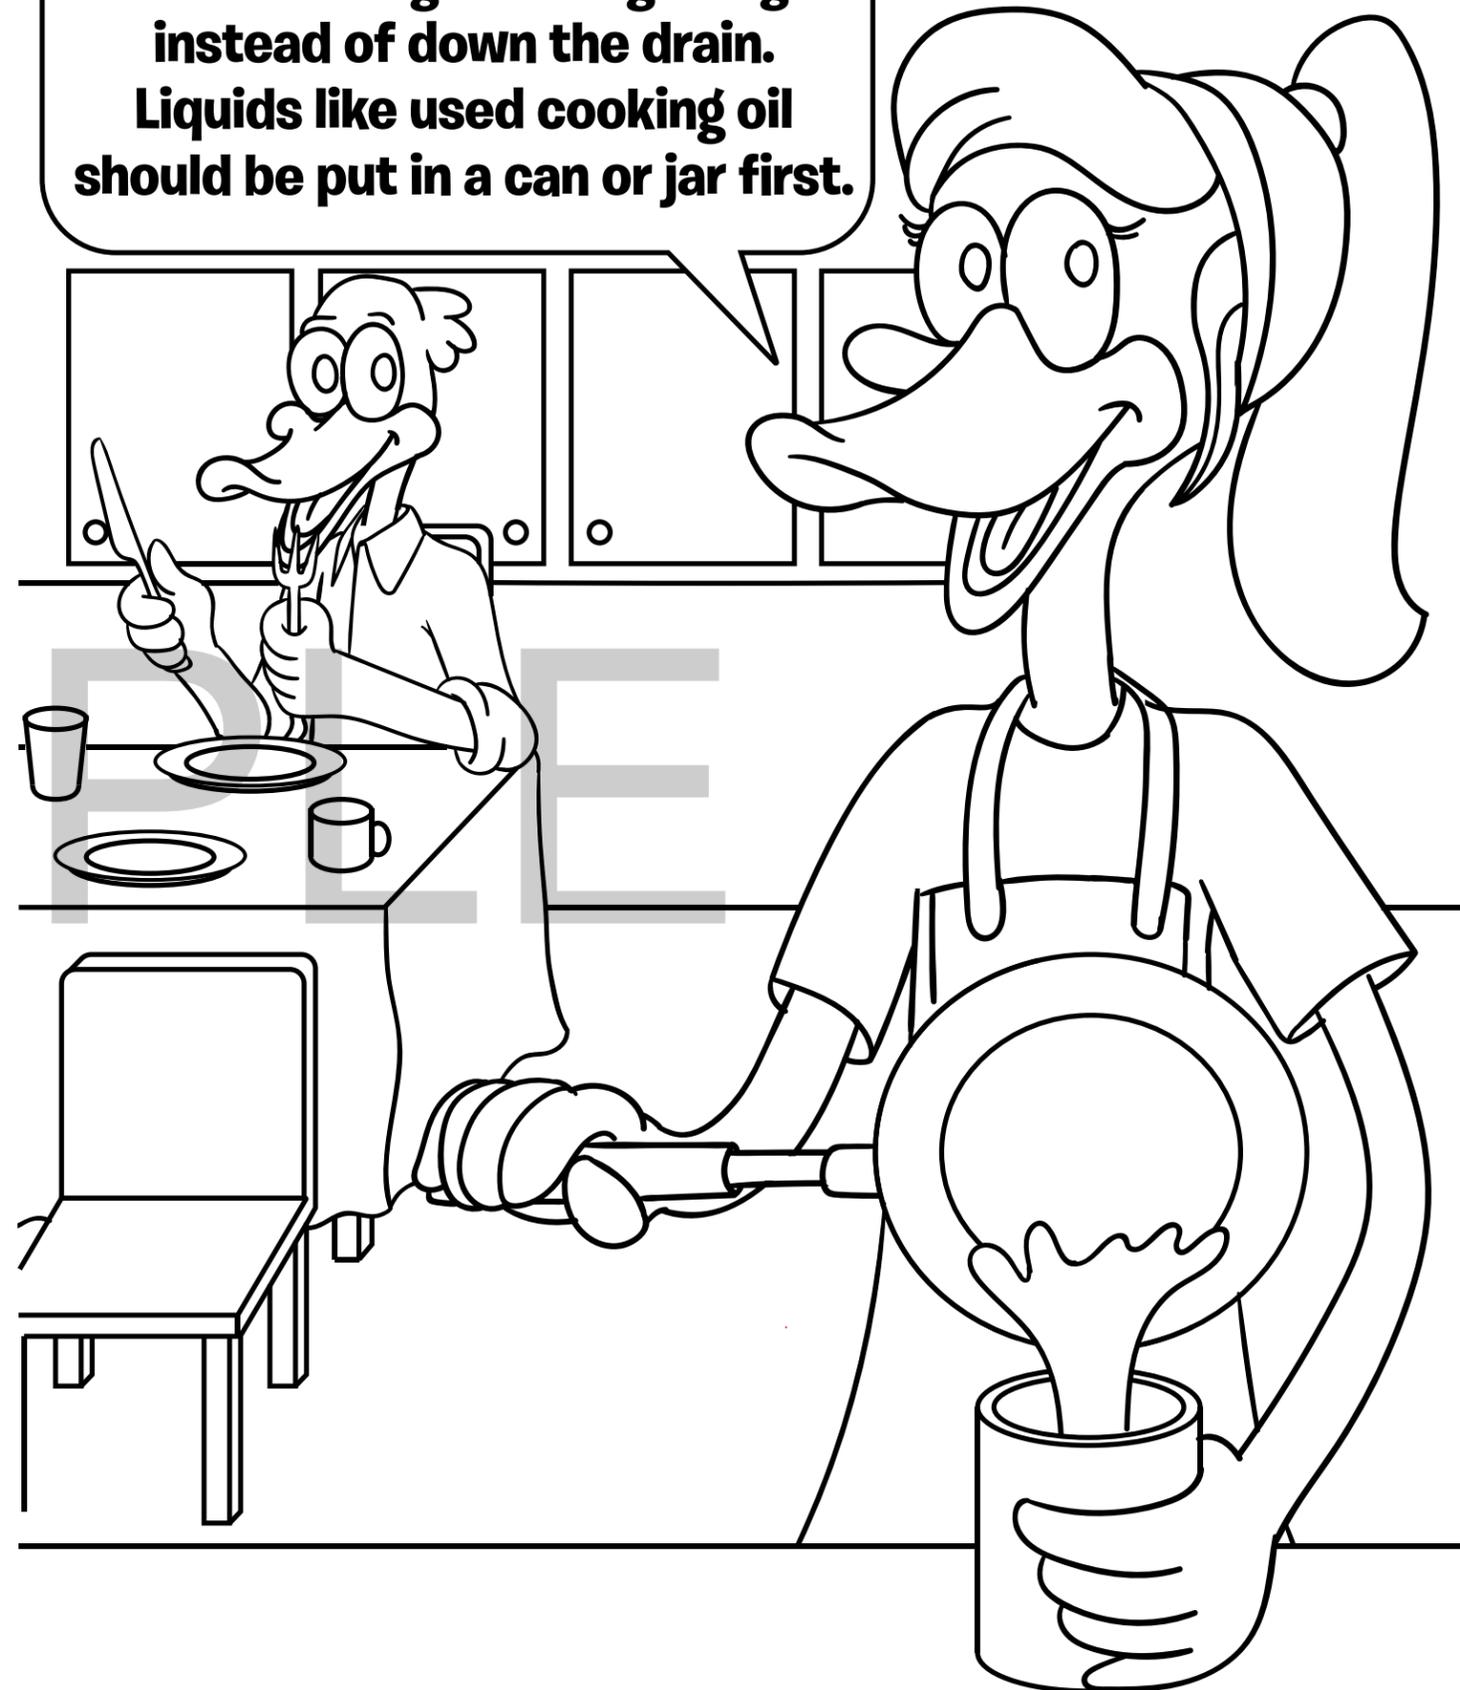

Peanut Butter

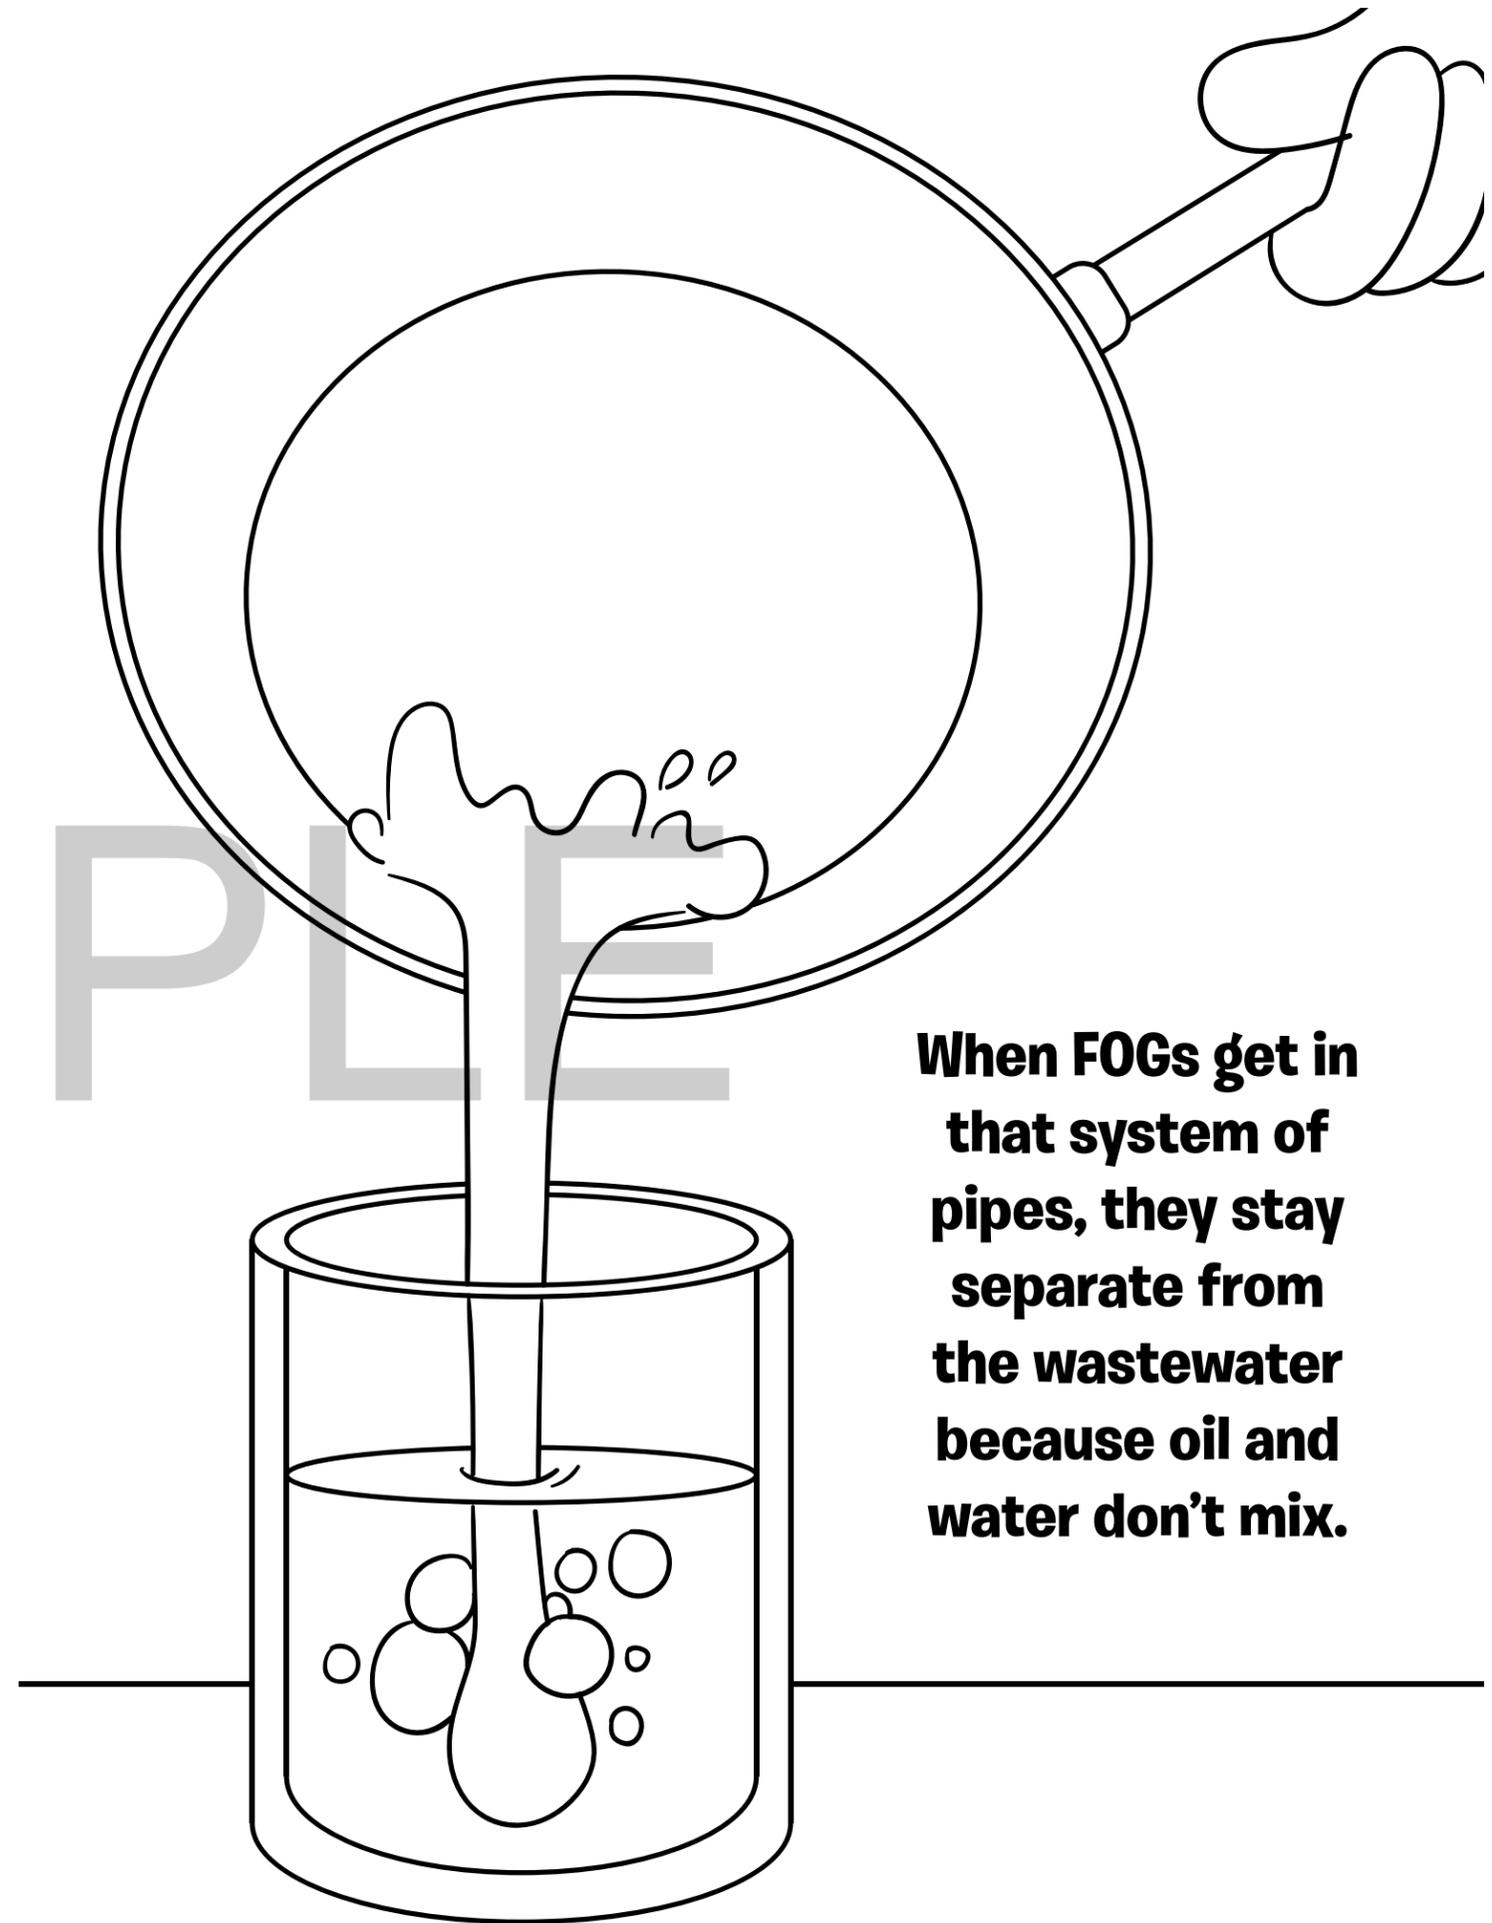

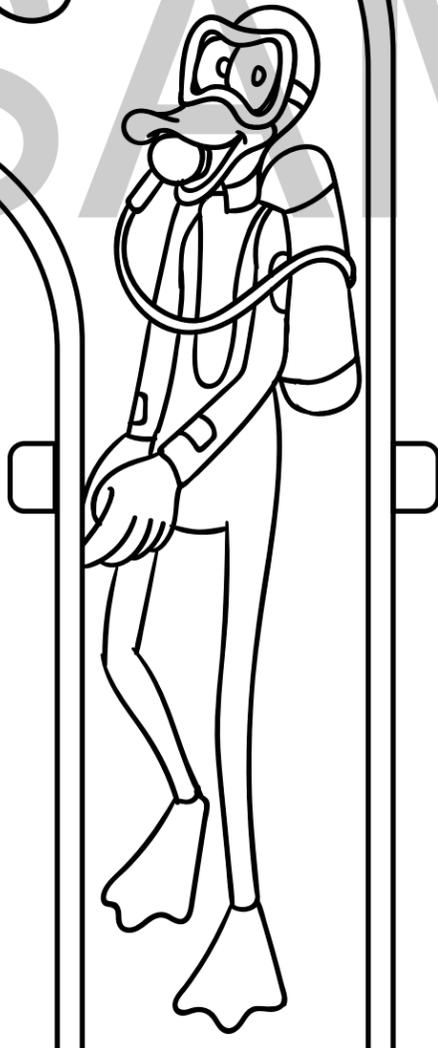

Pan Drippings

FOGs should go in the garbage instead of down the drain. Liquids like used cooking oil should be put in a can or jar first.

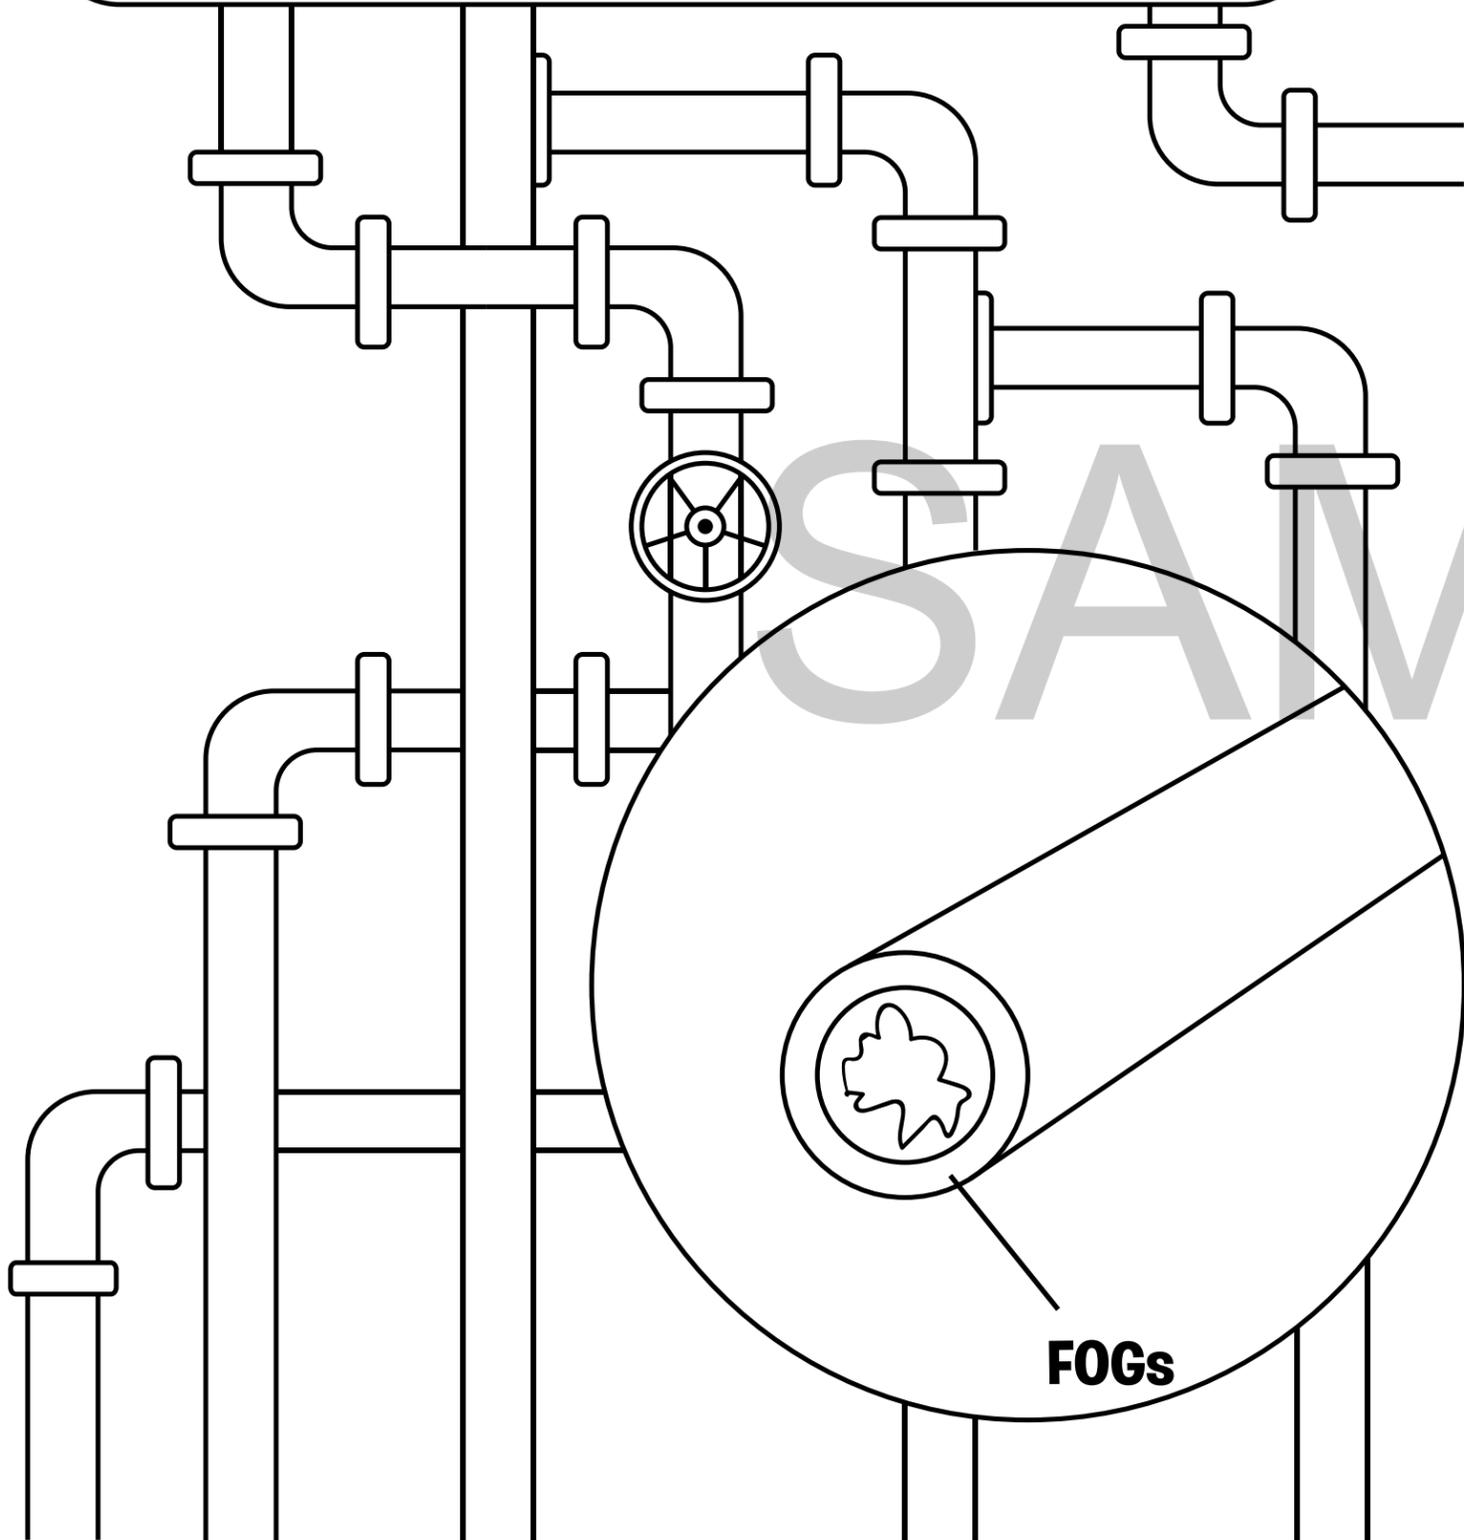

**Do you know where
your drains lead?**

**The drains in
your home lead
to a big system
of pipes and
eventually to
the sewer.**

**When FOGs get in
that system of
pipes, they stay
separate from
the wastewater
because oil and
water don't mix.**

FOGs are sticky. They stick to each other and to the sides of pipes. Your pipes can get clogged up with FOGs if they go down the drain.

Once FOGs get into the sewer, they can even form giant fatbergs that collect garbage and dirt. YUCK!

Fog in the air clouds your vision, making it hard to see. FOGs clog up the pipes, making it hard for water to move.

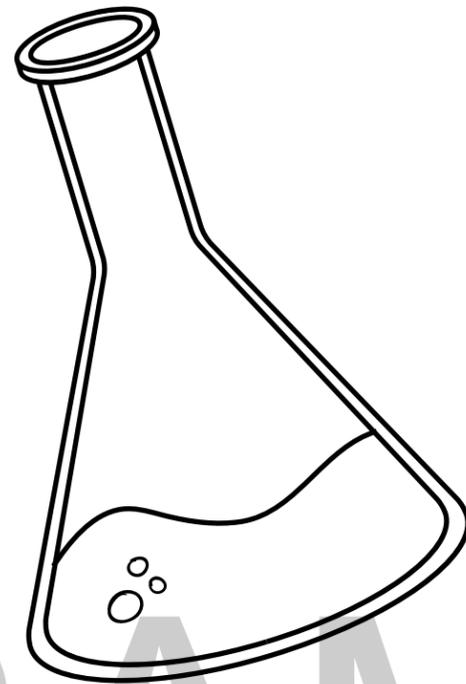

Can you find all the FOGs in this fridge?

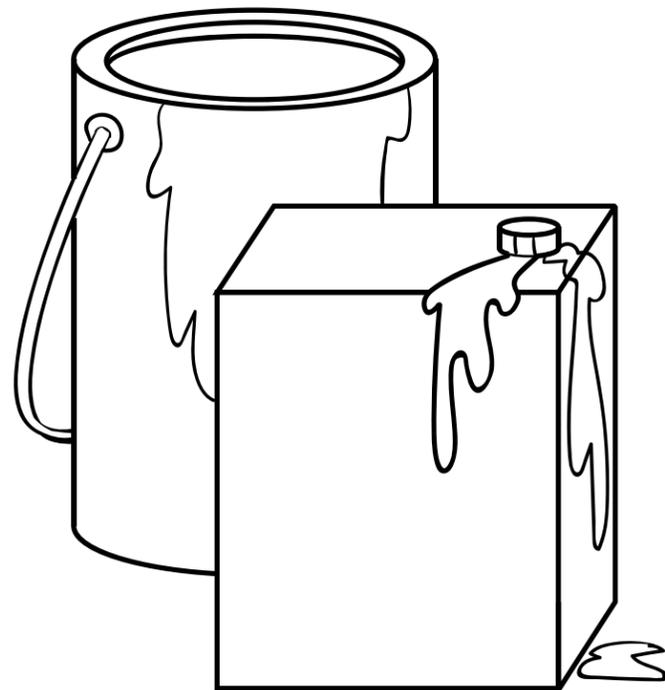

Here are some other things that you should never put in your toilets and drains.

Medications

Chemicals

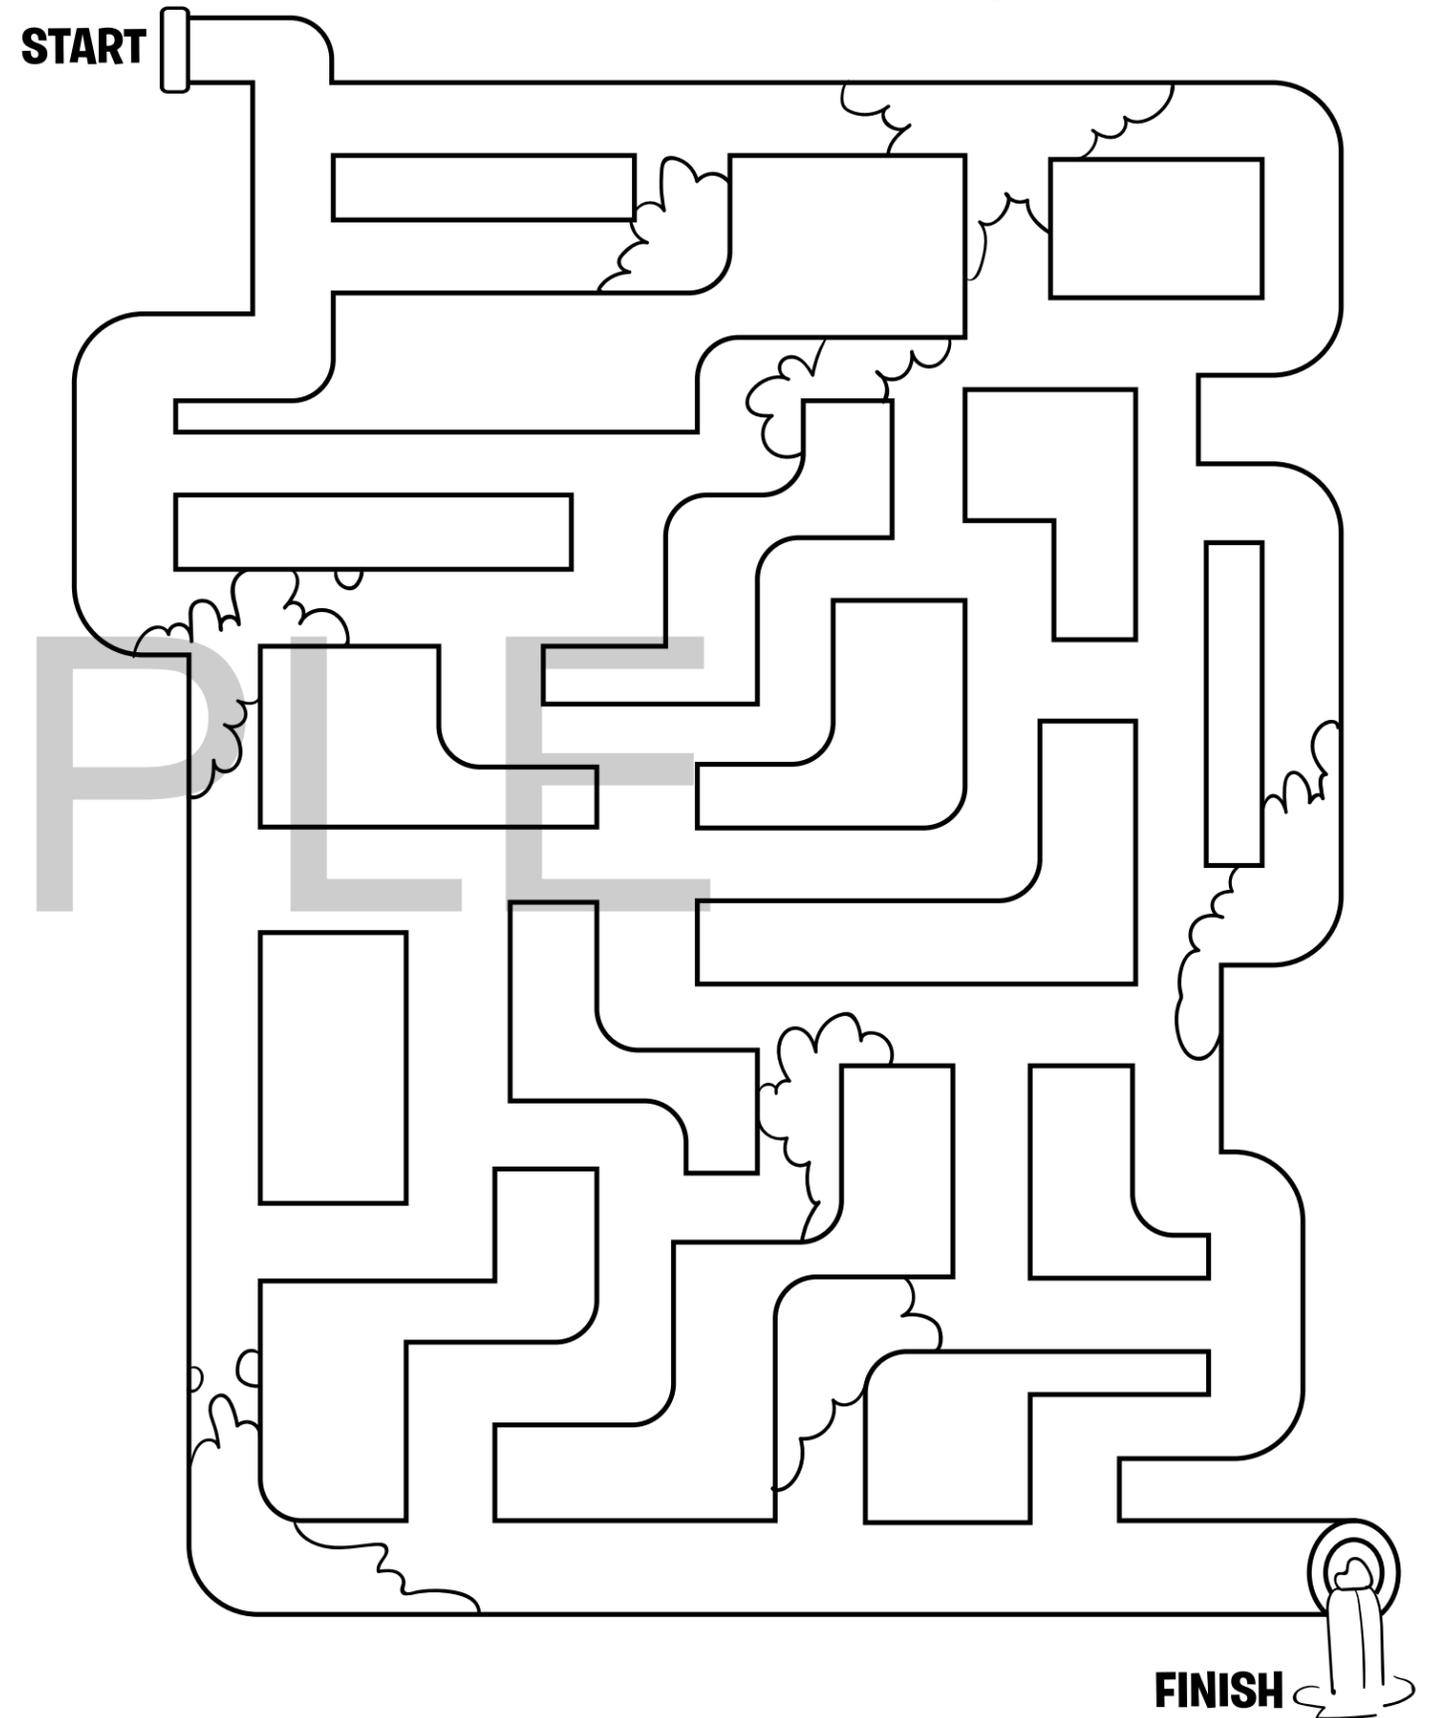

Paint and Paint Thinners

Wipes (even the “flushable” ones)

**Can you get through this maze of sewer pipes?
Don't touch the fatbergs!**

**Thanks for reading, and remember:
Don't Make a Splash-
Put FOGs in the Trash!**
