TIPS

Turning off the lights when you leave the room is a great way to save energy and save money, but there are lots of other things that you can do too.

• Turn off your computers, video games, tablets, and TVs when you are done using them.

• Decide what you want to eat before opening the fridge door. That way the cold air will stay in.

• Using water uses energy too – so turn off the faucet when you brush your teeth.
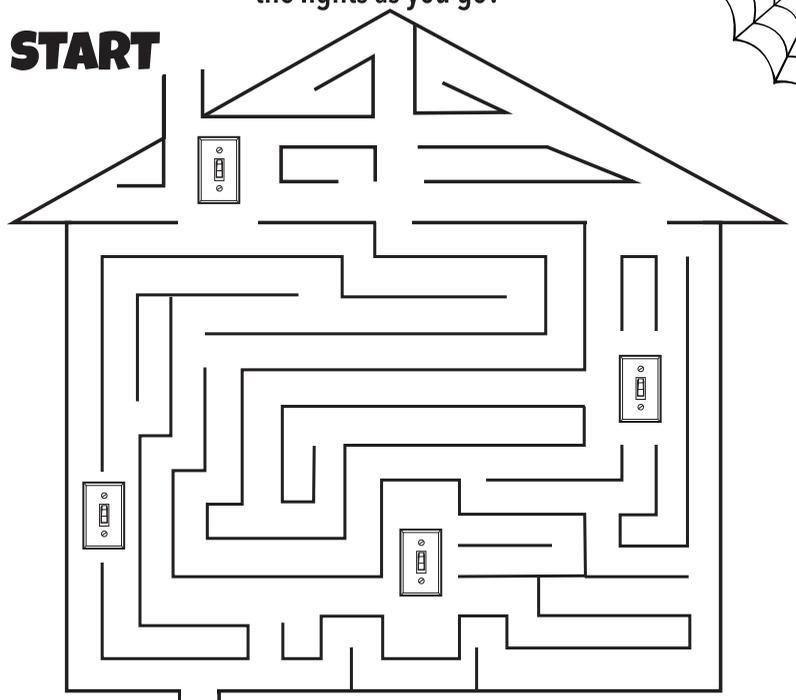

IF YOU FOLLOW THESE TIPS YOU'LL SCARE UP A BUNCH OF ENERGY SAVINGS!

Draw your own! Can you draw a scary face on this light switch?

Can you get through this maze and turn off all the lights as you go?
